PLATEA

Figure 1 displays three dot plots showing the distribution of the number of correct answers (0 to 15) for 15 items across three groups: U (Unimpaired), T (Tactile-impaired), and S (Sighted). The y-axis represents the number of subjects (0 to 34). The x-axis represents the number of correct answers (0 to 15). The plots show the frequency of correct answers for each item. The U plot shows a distribution peaking at 10 correct answers. The T plot shows a distribution peaking at 10 correct answers. The S plot shows a distribution peaking at 10 correct answers. The T plot shows a significant difference from the U plot for items 10, 8, 7, 9, 11, 13, 15, 17, 19, 21, 23, 25, 27, 29, 31, and 33.
